

GM Settings to work with Hikvision Device

To get GMail to work with HIKVISION™ devices you need to enter the details like so.

The password above

Needs to be the “app password” which you create in your google account. See

The screenshot shows the 'Sign-in & security' settings page for a Google account. The left sidebar contains navigation options: 'Welcome', 'Sign-in & security' (selected), 'Personal info & privacy', and 'Account preferences'. The main content area is titled 'Signing in to Google' and includes instructions on password security and a 'Make sure you choose a strong password' warning. A 'Password & sign-in method' section lists three items: 'Password' (last changed 14 minutes ago), '2-Step Verification' (on since May 27, 8:46 AM), and 'App passwords' (1 password). Each item has a right-pointing chevron icon.

You need to turn 2-step Verification on and then create an app password like below.

App passwords

App passwords allow 2-Step Verification users to access their Google Accounts through apps such as Mail on an iPhone or Mac, or Outlook. We'll generate the app passwords for you, and you won't need to remember them. [Learn more](#)

Name	Created	Last used	Access
CCTV	9:11 AM	9:14 AM	<button>REVOKE</button>

The important part for this is the SMTP server address which needs to be:

74.125.136.109
